EDUCATION

Certificate | University of Utah Professional Education Bootcamps

August 2023

University of Utah, Salt Lake City, UT

PROJECTS

Drill Sergeant Final Project

- Lead a group of four in designing and creating a tough love workout application from scratch using modern technologies
- Implemented a range of features such as goal creation and tracking, workout generation and monitoring, and access to historical workout data

React Portfolio

- Used React.js and Tailwind CSS to create a modern portfolio containing a resume, projects, and contact information
- Incorporated functionalities like light and dark mode options, single-page navigation links, and a responsive design

Become

- Created a full stack self-help app from scratch using MySQL, Sequelize, Node.js, Express.js, Handlebars.js
- Implemented features to keep track of goals, create time capsules for future dates, and see motivational quotes

Social Network API

- Designed an API for a social media app allowing for creation, deletion, and modification of users, thoughts, and reactions to thoughts
- Users can add and remove friends, post thoughts, and react to other user's thoughts

Weather Dashboard

- Used OpenWeather API, HTML, CSS, and jQuery to display a five-day weather forecast in any city
- Fetched and displayed current temperature, humidity, wind speed, and UV index in addition to five-day forecast
